

FINANCIAL AID OPPORTUNITIES

Billing (Business Office)

The Business Office will bill an incoming student for the first billing period in late July. This balance is based on the cost of the billing period less any financial aid approved at the time of billing.

Student Costs and Billing Cycle

School charges and all financial aid are divided into two periods. The first period begins when a student enrolls and the second period begins after one half of the academic coursework is successfully completed.

Enrolling students are required to have paid a \$250 confirmation deposit and to have completed financial arrangements to cover their school costs. Three payment options are available to assist students. (See back page)

Payment Option 1

The student pays the balance due for the payment period at or prior to registration. All financial aid must be completed and approved in order to be considered against the balance due.

Payment Option 2

In this option, grants, scholarships, outside resources and loans cover all school costs. In order to qualify, all aid must be completed and sent in before enrollment.

Payment Option 3

This option is available for those who prefer to spread the cost over the school year. A designated party (student, parent or other) completes and signs a Payment Plan Agreement to make monthly payments. The balance can vary from month to month due to other fees or as financial aid is completed. This payment plan **requires** a valid credit card or EFT number from a checking or savings account. Monthly payment plans are subject to a \$50 semester fee.
